

SOFTWARE

Use our trusted and proven software products and get results you can rely on. Cannot find what you are looking for? We also develop "à la carte" geostatistics libraries to better meet your requirements.

TRAINING

Maintain the highest standards of technical skills within your team with our experts. Learn in face-to-face courses or through virtual classrooms.

CONSULTANCY

Achieve best results with the help of our experts and improve your workflow adding our highly advanced know-how.

INNOVATION

We don't just do, we innovate. We partner with MINES ParisTech and companies through R&D consortia to ensure that you always have a solution that fits your problem.

HIGH LEVEL EXPERTISE GAINED FROM DECADES OF KNOW-HOW IN VARIOUS FIELDS

Bring your matters to our experts. We respond quickly and efficiently to your issues related to mapping, resource estimation and risk analysis:

sub-surface and oil reservoir modeling

mineral and life resource evaluation

air pollution, soil contamination or any soil property mapping

sampling optimization

uncertainty quantification and risk analysis

HIGHLY RELIABLE SOLUTIONS BASED ON 30+ YEARS EXPERIENCE IN GEOSTATISTICS SOFTWARE

ISATIS

General purpose and comprehensive geostatistics modeling software. A powerful and flexible toolbox for anyone dealing with spatialized data. The Reference geostatistics software.

MINESTIS

The industry-standard for mineral resource estimation. Includes domain modeling and ore control. A workflow-based approach to save you time.

KARTOTRAK

Workflow based software solution for chemical pollution or radiological contamination characterization. To adopt the methods recommended by international bodies.

OIL & GAS

GEOLOGICAL MODELING

RESERVOIR ENGINEERING

DEPTH CONVERSION

ENVIRONMENT

NUCLEAR RADIATION

SOIL POLLUTION

AIR POLLUTION

PRECISION AGRICULTURE

MINING

RESOURCE CLASSIFICATION

DRILL HOLE OPTIMIZATION

RESOURCE ESTIMATION

**WE OPERATE MAINLY IN ENERGY,
RESOURCES, AND ENVIRONMENTAL
SECTORS**

**500+ CLIENTS
WORLDWIDE
1500+ LICENSES
3 OFFICES
IN 3 CONTINENTS**

Geovariances has decades of know-how in mapping, resource estimation and risk analysis using state of the art geostatistical based solutions to deliver you superior results.

**WE CAN HELP YOU
ACHIEVE THE
VANGUARD OF
THE SPATIAL SCIENCES**
